# Kusum Verma

## VP and Chief Information Officer

**BIOGRAPHY**

Kusum Verma is the Chief Information Officer at Molex, where she leads the company's digital technology strategy and "One Molex" transformation. She is focused on delivering tangible benefits for our employees and customers by identifying where to best extract the value from our technology investments. She is responsible for aligning digital initiatives with Molex business strategy and advancing data and artificial intelligence capabilities to transform the customer and employee experience. Kusum is committed to strengthening Molex's cybersecurity and infrastructure frameworks while fostering innovation that fuels operational excellence across our core capabilities.

Before joining Molex in June 2025, Kusum held senior leadership roles at GE HealthCare and GE Capital, delivering transformative outcomes across Commercial Operations, Supply Chain, Services, Finance functions, and core enterprise infrastructure. Kusum also played a pivotal role in GE HealthCare's successful spin-off from GE Corporation, standing up the core infrastructure and corporate capability applications ecosystem focused on delivering a contemporary employee experience.

Kusum holds a Bachelor of Engineering in Electronics & Electrical Communication from Punjab Engineering College, India.

As a lifelong steward of building relationships and talent within communities for mutual benefit, Kusum serves on several nonprofit and industry boards, including i.c.stars Milwaukee.
