Steve Maciejewski

Senior Vice President, Business Development and Corporate Strategy

BIOGRAPHY

Steve Maciejewski serves as Senior Vice President for Molex's Business Development and Corporate Strategy capability and is a member of the Global Leadership Team.

Steve and his team serve as partners for Molex's market-focused divisions, helping chart paths for improvement across the business. He and his team are responsible for developing and executing a strategy for mergers and acquisitions (M&A) to capitalize on tailwinds and exciting opportunities in the markets we serve. Additionally, the Business Development and Corporate Strategy team helps identify opportunities to accelerate profitable growth and drive greater efficiency within the company.

Steve joined Molex in 2024. Most recently, he served as Vice President, Healthcare Systems & Technologies at Baxter International where he led M&A, strategy, transformation/integration and partnership teams for a global business unit. Prior to his career at Baxter, he worked at Hewlett Packard Enterprise, where he led business strategy, planning, and operations for all segments in the Datacenter Infrastructure Group. Steve has also held roles at GE Healthcare and AMD, where he began his career as a Design Engineer.

He is a graduate of the University of Michigan School of Engineering and Duke University's Fuqua School of Business. Steve, his wife, and two children live in the Chicago area.
